- » Dynamic workflow
- » Maximize your investment
- » Simplifies the exchange of information and movement of goods in real time
- » Eliminates annual physical counts
- » Provides optimal inventory control
- » Increases labor efficiency
- » Offers complete visibility into operations

Robust and centralized inventory control

The warehouse is the core of a company's productivity. The success and profitability of a company depends directly on the effective management of its warehouse. indago™ Warehouse Management System offers rich and broad functionality designed to optimize all of your warehouse activities.

indago™ combines radio frequency and barcode technology with a robust and scalable solution that enables you to boost productivity, reduce costs, shorten order fulfillment times and increase customer satisfaction.

When integrated with your ERP, indago™ provides the vital link in a total supply chain solution. indago™ streamlines all of your warehouse processes. Right from the receiving dock to the shipping doors, indago™ tracks every movement of stock.

Strengthen your warehouse by breaking down its walls

indago™ wms provides real time visibility into all of your warehouse operations, capturing and storing information on every movement of every product in and out of the building. Your warehouse can now become an accelerator to drive greater profitability and customer satisfaction, providing critical information throughout your enterprise.

The "right stuff" for end-to-end fulfillment and distribution

Eliminate the costly errors associated with fulfillment. indago™ provides you the ability to meet customer demands by getting the right product, to the right place, at the right time.

The promise of excellence

Speed the flow of goods and optimize warehouse operations

The bottom line: Operational Excellence

indago™ wms optimizes work direction at an operational level to dramatically increase efficiency and drive down costs.

Avoid costly errors with increased accuracy

Through real time work direction, verification, confirmation and integration, indago™ provides your employees and their managers with immediate access to information and processes. The accurate system ensures workers are productive and efficient.

Exceed customer expectations

indago™ empowers you to consistently deliver on customer promises with the ability to reduce cycle times, back orders and shortages. You will dramatically improve order accuracy and on-time shipments.

Boost on-time and complete shipments

Accurate order picking methods allow you to deliver complete orders on-time. Overall process efficiency decreases cycle times, resulting in more on-time shipments.

Achieve maximum ROI in a minimum time

With immediate gains in operational efficiencies, you can achieve fast ROI using the indago™ wms system. In many cases, payback is less than 12 months.

Key Features
